

FY26 Interim Financial Results

19 February 2026

ASX: PLS

Our Purpose

Vision

A leader in the provision of materials supporting the global energy transition

Mission

Powering a sustainable energy future

Strategic pillars

Operate

Deliver our operating performance commitments

Grow

Achieve full potential of our global assets

Chemicals

Extract greater value along the battery materials supply chain

Diversify

Diversify revenue beyond Pilgangoora

Built for resilience through the lithium cycle

Scale, strength, discipline, and diversification

Asset quality and cost resilience

100% owned Tier-1 assets with growth potential and strong cost position that protects margins through the cycle

Balance sheet strength and flexibility

With ~\$1B cash¹, PLS has the flexibility to invest, return capital or stay patient

Proven execution and discipline

Ability to flex production, manage costs, and pace or accelerate capital as conditions change — with every growth step gated by returns

Value chain exposure

Strategic downstream interests build value chain exposure beyond spodumene pricing

**COLINA
PROJECT,
BRAZIL**

GWANGYANG, SOUTH KOREA

POSCO Pilbara Lithium Solution

CHINA

Key offtake partners

**PILGANGOORA
OPERATION,

FY26 Interim results

Increase in sales and pricing supports strong financial outcomes

Positioning for growth³

Ngungaju restart approved – production to commence by July 2026

Upstream portfolio – growth study timelines and sequencing updated

1. Average estimated 5.3 Li₂O grade per tonne (SC5.3 CIF China) equivalent sales price as at 26 January 2026. The final adjusted price may be higher or lower.

2. Underlying EBITDA is defined as earnings before net finance costs, tax, depreciation, amortisation, share of profit/(loss) from P-PLS and Mid-Stream Demonstration Plant Project costs. Net finance costs are detailed in Note 2.3 of the FY26 Interim Financial Report.

3. For more information see the ASX announcement titled "Ngungaju plant restart and growth studies update" dated 19 February 2026.

FY26 Interim sustainability performance

Continued focus on safety first culture and sustainability outcomes

Valuing our people and communities

3.79

TRIFR¹ increased from 3.10 in H1FY25

3.38

Quality safety interactions² frequency rate – an increase from 2.34 in H1FY25

Sustainable operations

Positive trend ESG ratings

ISS, Sustainalytics and S&P Global³

AA

Maintained leading MSCI rating⁴

Responsible and ethical actions

YEAR TO DATE

\$397.7M

Procurement spend with Australian businesses

\$16.4M

First Nations business spend

1. Recordable injury numbers and Total Recordable Injury Frequency Rate include Australian sites for the whole period and Brazil sites only from the date of acquisition in February 2025. TRIFR is measured on 12-month moving average as at 31st December 2025.
2. Quality safety interactions at Australian sites are a measure of leadership safety conversations measured per 1,000 hours worked for the half-year and provide a lead indicator for the promotion of a strong safety culture.
3. ESG scores can be subject to change throughout the year; PLS' ratings were maintained or improved across key major providers as at December 2025.
4. As at January 27 2026, PLS maintained an MSCI EGS rating of AA.

FY26 Interim Results - Financials

Financial results summary

Production growth, lower cost and improved pricing deliver strong H1 FY26 earnings

Summary Operational and Financial Metrics

	Units	H1 FY26	H1 FY25	% Δ
Operations				
Production	kt	432.8	408.3	6
Sales	kt	446.0	418.6	7
Realised price	US\$/t	965 ¹	688 ²	40
	US\$/t SC6	1,105	780	42
Unit Cost				
Unit operating cost (FOB) ³	A\$/t	563	614	(8)
Unit operating cost (CIF) ⁴	A\$/t	682	724	(6)
Profit and Loss				
Revenue	\$M	624	426	47
Underlying EBITDA ⁵	\$M	253	74	241
Underlying EBITDA margin ⁶	%	41	17	23
Net profit/(loss) after tax	\$M	33	(69)	147
Cash and liquidity				
Cash	\$M	954	1,171	(18)
Undrawn loan facilities	\$M	625	625	-
Liquidity	\$M	1,579	1,796	(12)

- **Production volume** of 432.8kt, up 6% on prior corresponding period (pcp), driven by expanded capacity under P850.
- **Sales** of 446.0kt, up 7% on pcp, with average realised price of US\$965/t.
- **Revenue** increased 47% to \$624M reflecting improved realised pricing and higher sales volume.
- **Unit operating cost (FOB)** improved 8% to \$563/t driven by operational efficiencies and increased sales volumes.
- **Underlying EBITDA** of \$253M increased 241% with margins expanding to 41% from 17% in the pcp.
- **Net profit after tax** of \$33M (H1 FY25: loss of \$69M) includes \$16M of Mid-Stream Demonstration Plant project costs and \$39M non-cash P-PLS investment impacts (see Appendix A2).
- Strong **cash balance** of \$954M and total **liquidity** of \$1.6B provide financial flexibility for strategic opportunities and growth.

1. Average estimated realised price for ~5.3 Li2O grade (SC5.3 CIF China) as at 26 January 2026. The final adjusted price may be higher or lower than the estimated realised price.

2. Estimated realised price for ~5.3 Li2O grade as reported in the FY25 Interim Results Report dated 20 February 2025.

3. Unit operating cost (FOB Port Hedland excluding freight and royalties) includes mining, processing, transport, port charges, and site based general and administration costs and is net of any tantalite by-product credits. It is calculated on an incurred basis (including accruals), and includes inventory movements, and credits for capitalised deferred mine waste development cost, and it excludes depreciation of fixed assets and right of use leases, and amortisation of deferred stripping.

4. Unit operating cost (CIF China) includes the unit operating costs (FOB Port Hedland excluding freight and royalties) plus freight and royalty costs. Royalty costs include a 5% state government royalty on the FOB selling price, a 1% native title royalty on the FOB selling price, and a 5% private royalty on the FOB selling price which is only applied to the part of the resource/reserve acquired following the Altura Lithium Operation acquisition.

5. Underlying EBITDA is defined as earnings before net finance costs, tax, depreciation, amortisation, share of profit/(loss) from P-PLS and Mid-Stream Demonstration Plant Project costs. Net finance costs are detailed in Note 2.3 of the FY26 Interim Financial Report.

6. Underlying EBITDA margin is calculated as Underlying EBITDA as a percentage of revenue.

H1 FY26 – cash flow bridge

Sustainable cash generation through operational discipline and cost efficiency

Cash flow bridge – 30 June 2025 to 31 December 2025 (\$M)

- **Cash balance** remained strong at \$954M as at 31 December 2025, decreasing \$20M during the half, primarily due to working capital timing.
- **Cash margin from operations** for the half was \$174M. Adjusting for \$32M FY25 customer refunds and \$85M of December Quarter 2025 provisional pricing adjustments expected to be received in the March Quarter 2026, underlying cash margin from operations would be \$291M.
- **Capital expenditure** of \$123M on a cash basis (\$109M on an accruals basis) comprised infrastructure and projects of \$46M, mine development of \$42M and sustaining capital of \$22M. FY26 capital expenditure is expected to be second half weighted.
- **Other investing cashflows** includes a \$38M equity contribution into P-PLS, maintaining PLS' 18% ownership.
- **Financing cash outflows** of \$42M included \$22M interest and finance costs, and \$21M of principal lease repayments.

1. Cash margin from operations is calculated as receipts from customers less payments for operational costs.

2. \$69M of other operating costs includes \$35M of Corporate and Administration expenses, \$19M of Mid-Stream Demonstration Plant project costs, \$20M of Brazil costs and \$15M of exploration and feasibility expense partly offset by \$20M interest income.

Balance sheet summary

Summary Balance Sheet Metrics

\$M	31-Dec-25	30-Jun-25	% Δ
Cash	954	974	(2)
Receivables	122	38	218
Inventories, current and non-current	277	276	0
Property, plant, equipment and mine properties	2,738	2,702	1
Financial asset, current and non-current	16	25	(34)
Equity accounted investments	71	61	17
Current tax asset	-	69	(100)
Exploration and evaluation assets	520	522	(0)
Total Assets	4,698	4,667	1
Payables, current and non-current	147	237	(38)
Current Tax Liability	7	-	n.a.
Borrowings, current and non-current ¹	365	364	0
Lease, current and non-current ¹	260	226	15
Convertible bond ¹	95	93	3
Deferred tax liabilities	172	131	31
Other, current and non-current	82	86	(5)
Total liabilities	1,129	1,136	(1)
Equity	3,570	3,531	1

- **Receivables** increased primarily due to higher trade debtors from favourable provisional pricing adjustments on December Quarter shipments.
- **Inventory** remained flat with increased ore stockpiles supporting ore supply security through the wet season, largely offset by lower spodumene inventory as sales volumes exceeded production.
- **Equity accounted investments** increased by \$11M, is driven by the Group's \$38M equity contribution to maintain PLS's 18% ownership interest in P-PLS, partly offset by a \$23M share of loss.
- **Current Tax Asset** decreased by \$69M following receipt of the prior year income tax refund.
- **Borrowings** remained flat at \$365M, reflecting the Group's Revolving Credit Facility.
- **Lease liabilities** increased 15% to \$260M, driven by new finance leases under Phase 2 of the Heavy Mobile Equipment strategy, partially offset by depreciation.

1. Borrowings, Convertible Bond and Lease liabilities are shown collectively as Borrowings and Lease liabilities on the statutory Balance sheet. Refer to note 5.2 of the Interim Statutory Financial Statements.

**Strategically
positioned and
disciplined**

Building scale and strengthening margins

Structural operating improvements are enhancing margin resilience through-the-cycle

Recovery

Disciplined portfolio sequencing through the cycle

Preserved balance sheet strength; selectively activating value levers as fundamentals improve

Spodumene concentrate price (US\$/t SC6.0, CIF China basis)^{1,2}

1 CY23 → CY25 – Capital preservation phase

- ✓ Preserved operating capability and balance sheet strength through the downturn (P850, cost optimisation).
- ✓ Retained diversified upstream and downstream options.

2 CY26 – Optimising production portfolio

- ✓ Strengthening market fundamentals and customer engagement support re-evaluation of production value levers.
- ✓ Progression remains subject to Final Investment Decision, market conditions, disciplined capital allocation and maintaining strong balance sheet.

1. Average of major price reporting agencies (SC6.0, CIF China basis).
2. Period from 1 July 2021 to 15 February 2026.

Ngungaju restart – disciplined capacity reactivation

Capital-light reactivation delivering incremental production capacity from July 2026

Ngungaju operation restart approved

- Following sustained improvement in pricing and secured offtake support, the Board has approved the restart of the ~200ktpa¹ Ngungaju plant.
- New offtake agreement secured providing floor price and pre-pay - provides downside protection with full upside pricing exposure underwrites financial returns of the restart.²

Restart readiness

- Crusher upgrade and other plant readiness works completed in December 2025.
- Workforce recruitment, mobilisation and training to commence.
- Period to operational recommencement ~4 months.

Guidance and reporting

- Physical and financial metrics to be disclosed at the Pilgangoora Operation level.
- FY26 - Unit operating costs expected to increase modestly in H2 FY26 due to restart, remaining within FY26 guidance range (\$560/t to \$600/t).
- No material capital increase for restart and no increase to FY26 CAPEX guidance.
- FY27 - Production, cost and capital guidance to be provided in July 2026.

1. Refers to concentrate produced and is based on the current mine plan and SC5.2% grade. Ultimate production achieved in any year will depend on the concentrate grade and ore grade and is variable over the mine plan.

2. For more information see the ASX announcement titled "PLS executes offtake agreement with Canmax" dated 10 February 2026.

Sequenced growth pipeline

Upstream portfolio staged, subject to returns and market conditions

P2000 – Brownfields expansion (to ~2Mtpa)

Study Timeline

- Feasibility Study targeted for release in December Quarter 2026.

Overview

- Brownfields expansion at Pilgangoora would lift Pilgangoora production capacity to ~2Mtpa¹, subject to FID.
- Major study work underway includes process plant FEED, design engineering, mine planning and reserve optimisation, regulatory preparation, water supply assessment, metallurgical refinement and supporting infrastructure definition.
- Production volumes from this potential expansion remain unallocated providing strategic flexibility and potential funding pathways.

Colina Project – Greenfields development

Study Timeline

- Feasibility Study targeted for release in December Quarter 2027 - timing incorporates additional drilling and project optimisation work.

Overview

- Project provides geographic and production diversification through the development of a new greenfields mine in Minas Gerais, Brazil.
- Increasing geological, metallurgical and engineering knowledge supporting progression of a Feasibility Study.
- Feasibility study to incorporate metallurgical testwork, mine, processing, infrastructure and financial studies – leveraging PLS' lithium development and operating expertise.
- Early-stage, pre-FID enabling infrastructure (road, power, water supply) is under consideration - subject to Board approvals and capital allocation thresholds.

FID subject to study outcomes, funding capacity and market conditions

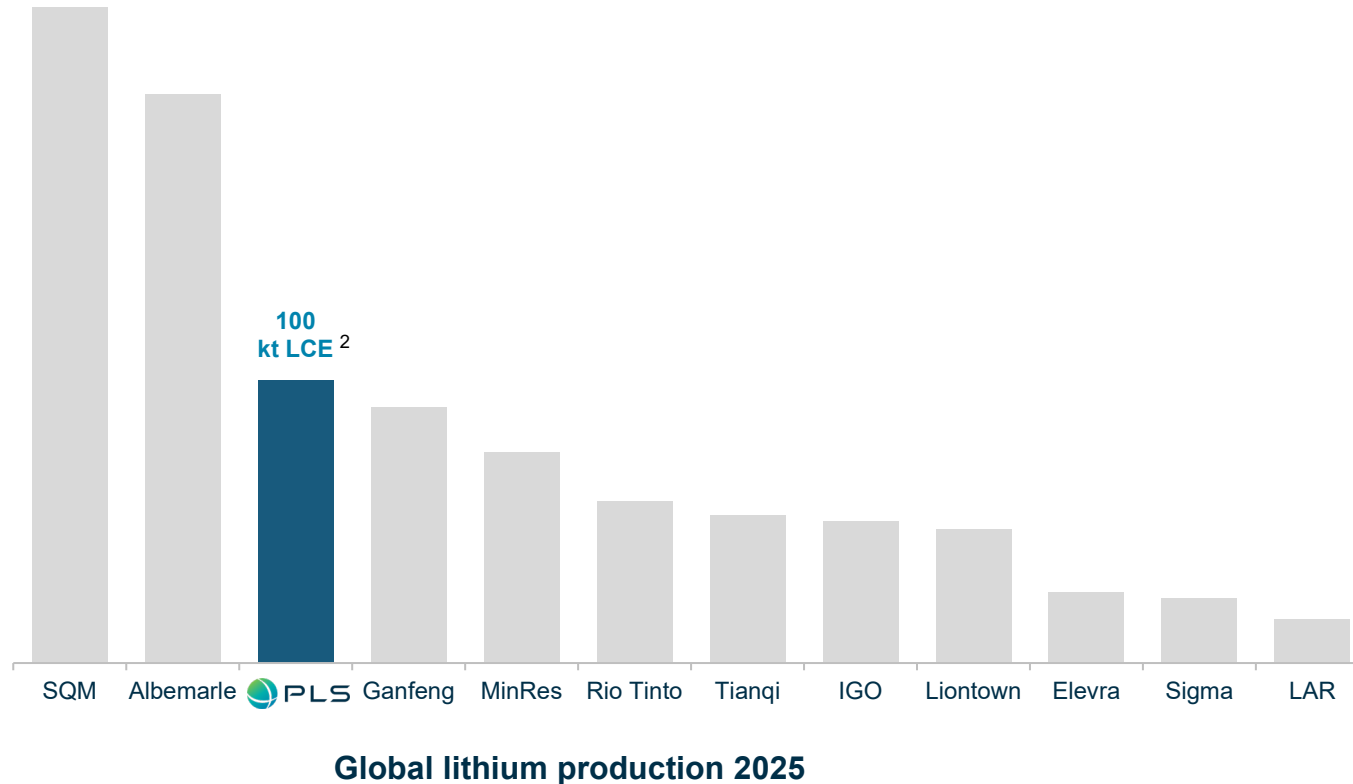

1. For more information see the ASX announcement titled "Study delivers 2Mtpa expansion option" dated 21 June 2024.

Potential production profile

Top 3 global primary lithium producer with further long-term production capacity potential

CY25 global lithium production – key peers
(kt LCE primary production, attributable basis)¹

Colina project⁴
(future)

P2000 Project
expansion
Project (future)

P1000
Installed capacity
(incl. Ngungaju)

Future³

All future production
subject to study outcomes,
FID and market conditions.

1. Company filings (where available) and BMI Q4-25 Lithium Forecast (otherwise). Estimates may not include all producers, such as those that don't publicly disclose production. See slide 28 for further information.
2. PLS 2025 production excludes Ngungaju as the facility was in care and maintenance.
3. Illustrative production capacity ('P1000' and 'P2000') based on Ore Reserve grade – actual production will vary year to year and is subject to completion of studies / FID for P2000 Project. For more information see the ASX announcement titled "Study delivers 2MTPA expansion option" dated 21 June 2024.
4. Any future production from Colina Project in Brazil is subject to completion of project studies and FID.

Growth optionality - chemicals

Measured downstream investments provide diversification and long-term optionality

Image: Mid-Stream demonstration plant as at 29 January 2026

Mid-Stream Demonstration Plant

- Demonstration-scale facility to inform potential commercial development.
- Construction completed in the December Quarter 2025 - commissioning update expected in coming months.
- Strategic restructure agreed with Calix¹
 - PLS to acquire Calix's interest in Demonstration Plant for A\$11.4M; assuming full ownership, funding and operational control.
 - Perpetual royalty-free licence secured for Calix calciner technology in all primary lithium processing applications at PLS plants.

POSCO Pilbara Lithium Solution (P-PLS) Lithium Hydroxide chemical facility

- 18% minority interest in 43ktpa (nameplate) lithium hydroxide facility in Gwangyang, South Korea.
- Both trains strategically idled in December Quarter 2025 to preserve capital and align with market conditions.

Joint Downstream Partnering Study (Ganfeng)

- Joint feasibility study complete, identifying several potential sites across multiple jurisdictions - sunset date extended to September Quarter 2027.
- Progressing detailed site selection and pre-FID activities.

1. For more information see the ASX announcement titled "PLS and Calix agree revised structure to advance Mid-Stream lithium technology" dated 19 February 2026.

Market update

Global electrification supporting energy transition

Global electricity demand growth (Thousand TWh)^{1,2}

~5,400 TWh
of additional electricity demand
to 2030 – growing 3.6% p.a.
50% above prior decade

Battery storage
critical to enabling the
global energy transition

Income tax (expense)/benefit	(45)	5	(1,000)	I
Net profit/(loss) after tax	33	(69)	147	

1. Underlying EBITDA is defined as earnings before net finance costs, tax, depreciation, amortisation, share of profit/(loss) from P-PLS and Mid-Stream Demonstration Plant Project costs. Net finance costs are detailed in Note 2.3 of the Interim Financial Report.
2. Reflects PLS' equity-accounted share of loss of its 18% interest in P-PLS.
3. Reflects \$16M non-cash write down of the Group's call option in P-PLS.

Appendix A3 - Reconciliation

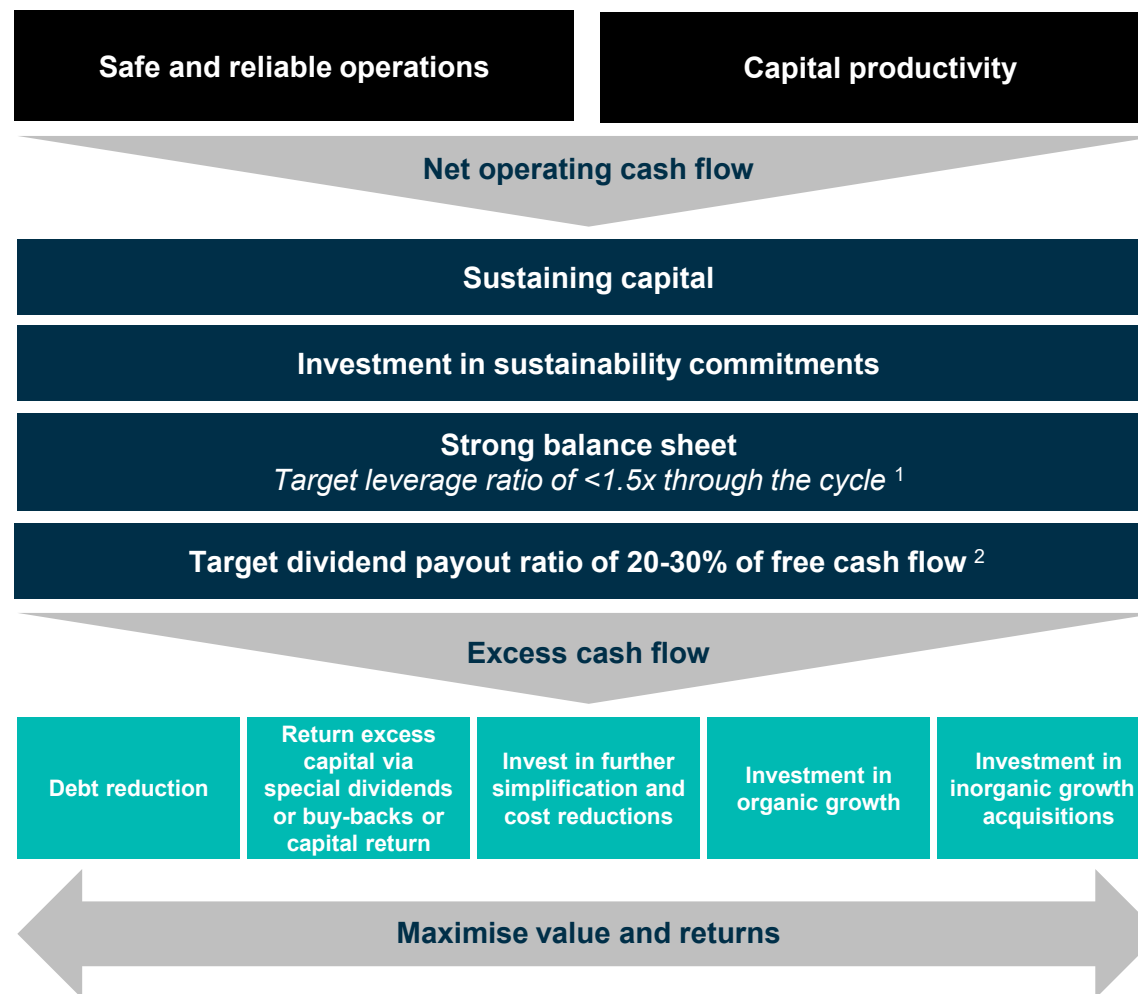

Reconciliation – H1 FY26 statutory operating cost to FOB operating cost (\$M)

References

- A. Operating costs as per financial statements note 2.1
- B. Refer to note 2.1.2 in the financial statements for depreciation within operating costs.
- C. Refer to note 2.1.2 for shipping expenses in operating costs. Not separately disclosed in the financial statements but included in operating expenses Note 2.1.2 (Mining and processing costs).
- D. Refer to note 2.1.2 for royalty expenses in operating costs.

PLS Capital Management Framework

1. Net senior debt /EBITDA, subject to prevailing market conditions.

2. Free cash flow is defined as statutory cashflow from operating activities less tax paid / payable less sustaining capital (inclusive of capitalised waste mine development).

Important notices

Important notices

This document has been prepared by PLS Group Limited (PLS or the Group) and is dated 19 February 2026. This document should be read in conjunction with the ASX announcement titled "FY26 Interim Results" released to the ASX on 19 February 2026.

Not an offer of securities

This document is provided for informational purposes and does not constitute or contain an offer, invitation, solicitation or recommendation with respect to the purchase or sale of any security in PLS. This document is not a prospectus, product disclosure statement or other offering document under Australian law or any other law, will not be lodged with the Australian Securities and Investments Commission, and may not be relied upon by any person in connection with an offer or sale of PLS' securities.

Summary information

This document contains a summary of information about PLS and its activities that is current as at the date of this document unless otherwise stated. The information in this document is general in nature and does not contain all the information which a prospective investor may require in evaluating a possible investment in PLS or that would be required in a prospectus or a product disclosure statement prepared in accordance with the Corporations Act 2001 (Cth) (Corporations Act) or the securities laws of any other jurisdiction. The information in this document should be read in conjunction with PLS' other periodic and continuous disclosure announcements lodged on the ASX.

No liability

The information contained in this document has been prepared in good faith by PLS, however no guarantee, representation or warranty expressed or implied is or will be made by any person (including PLS and its affiliates and their directors, officers, employees, associates, advisers and agents) as to the accuracy, reliability, correctness, completeness or adequacy of any statements, estimates, options, conclusions or other information contained in this document. No person other than PLS is responsible for the preparation of this document. To the maximum extent permitted by law, PLS and its affiliates and their directors, officers, employees, associates, advisers and agents each expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of or reliance on information contained in this document including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out of or derived from, or for omissions from, this document including, without limitation, any financial information, any estimates, forecasts, or projections and any other financial information derived therefrom. Statements in this document are made only as of the date of this document unless otherwise stated and the information in this document remains subject to change without notice. No responsibility or liability is assumed by PLS or any of its affiliates (or their directors, officers, employees, associates, advisers and agents) for updating any information in this document or to inform any recipient of any new or more accurate information or any errors or mis-descriptions of which PLS and any of its affiliates or advisers may become aware.

Not Financial Product Advice

This document does not constitute financial product advice or take into account your investment objectives, taxation situation, financial situation or needs. This document consists purely of factual information and does not involve or imply a recommendation or a statement of opinion in respect of whether to buy, sell or hold a financial product. An investment in PLS is considered to be speculative in nature and is subject to known and unknown risks, some of which are beyond the control of PLS. Before making any investment decision in connection with any acquisition of securities, investors should consult their own legal, tax and/or financial advisers in relation to the information in, and action taken on the basis of, this document.

Reporting of Mineral Resources and Ore Reserves

Recipients of this presentation outside Australia should note that it is a requirement of the Australian Securities Exchange listing rules that the reporting of ore reserves and mineral resources in Australia comply with the Australasian Joint Ore Reserves Committee Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code"), whereas mining companies in other countries may be required to report their ore reserves and/or mineral resources in accordance with other guidelines (for example, SEC regulations in the United States). Such estimates of reserves are largely dependent on the interpretation of data and may prove to be incorrect over time. No assurance can be given that the reserves and contingent resources presented in the document will be recovered at the levels presented. Recipients should note that while PLS' mineral resource and ore reserve estimates comply with the JORC Code, they may not comply with the relevant guidelines in other countries including SEC regulations. You should not assume that quantities reported as "resources" will be converted to reserves under the JORC Code or any other reporting regime or that PLS will be able to legally and economically extract them.

Forward looking statements

Statements contained in this document, including but not limited to those regarding possible or assumed production, sales, future capital and operating costs, projected timeframes, performance, dividends, returns, revenue, exchange rates, potential growth of PLS, the timing and amount of synergies, the future strategies, results and outlook of the combined Pilgangoora Operation, industry growth, commodity or price forecasts, or other projections and any estimated Group earnings are or may be forward looking statements. Forward-looking statements can generally be identified by the use of words such as 'project', 'foresee', 'plan', 'expect', 'aim', 'intend', 'anticipate', 'believe', 'estimate', 'may', 'should', 'will' or similar expressions. Forward looking statements including all statements in this presentation regarding the outcomes of preliminary and definitive feasibility studies, projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. These statements relate to future events and expectations and as such involve known and unknown risks and significant uncertainties, many of which are outside the control of PLS. Actual results, performance, actions and developments of PLS may differ materially from those expressed or implied by the forward-looking statements in this document. Such forward-looking statements speak only as of the date of this document. There can be no assurance that actual outcomes will not differ materially from these statements. To the maximum extent permitted by law, PLS and any of its affiliates and their directors, officers, employees, agents, associates and advisers: disclaim any obligations or undertakings to release any updates or revisions to the information in this document to reflect any change in expectations or assumptions; do not make any representation or warranty, express or implied, as to the accuracy, reliability or completeness of the information in this document, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement; and disclaim all responsibility and liability for these forward-looking statements (including, without limitation, liability for negligence). Nothing in this document will under any circumstances create an implication that there has been no change in the affairs of PLS since the date of this document.

Important notices

Important Information regarding Mineral Resources, Ore Reserves

Information in this document regarding production targets and expansions in nameplate capacity of the Pilgangoora Operation in respect of the P850 and P1000 operating models and the P2000 expansion project, are underpinned solely by the Group's existing Ore Reserves that have been prepared by a Competent Person (Mr Ross Jaine) in accordance with the JORC Code (2012 Edition). The Ore Reserve was released by the Group to ASX on 24 August 2023 in its release titled "55Mt increase in Ore Reserves to 214Mt" (August 2023 Release) and the 2025 Annual Report, dated 25 August 2025, which sets out the adjustment for depletion. The relevant proportions of proved Ore Reserves and probable Ore Reserves underpinning the production targets are 6% proved Ore Reserves and 94% probable Ore Reserves. The Group confirms it is not aware of any new information or data that materially affects the information included in the August 2023 Release or the 2025 Annual Report, and that all material assumptions and technical parameters underpinning the Ore Reserves estimates continue to apply and have not materially changed. The Group confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Information in this document relating to Mineral Resource estimates is extracted from the ASX release dated 11 June 2025 titled "Pilgangoora Mineral Resource update delivers 23% increase in contained lithium" and the 2025 Annual Report, which sets out the adjustment for depletion. The Group confirms that it is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the Mineral Resource estimates continue to apply and have not materially changed. The Group confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Guidance as to Production, Unit Costs and Capital Expenditure

Any guidance as to production, unit costs and capital expenditure in this presentation is based on assumptions, budgets and estimates existing at the time of assessment which may change over time impacting the accuracy of those estimates. These estimates are developed in the context of an uncertain operating environment including in respect of inflationary macroeconomic conditions and uncertainties surrounding the risks associated with mining and further optimisation of the Pilgangoora Operation operating model which may impact production and have a flow on effect on sales. Actual results may therefore vary significantly depending on these risks and the timing required to address them. The information is therefore provided as an indicative guide to assist sophisticated investors with modelling of the Group. It should not be relied upon as a predictor of future performance.

Rounding

Throughout this presentation, amounts may not add due to rounding

Past performance

Statements about past performance are not necessarily indicative of future performance.

References to Australian dollars

All references to dollars (\$) and cents in this report are to Australian currency, unless otherwise stated.

Acceptance

By accepting, accessing or reviewing this document you acknowledge, accept and agree to the matters set out above.

Authorisation of release

Release of this presentation is authorised by Mr Dale Henderson, Managing Director & CEO.

Online communications

PLS encourages investors to be paperless and receive Group communications, notices and reports by email. This will help further reduce our environmental footprint and costs.

Shareholder communications available online include the Annual Report, Voting Forms, Notice of Meeting, Issuer Sponsored Holding Statements and other company related information. Investors can view, download or print shareholding information by choice. To easily update communication preferences, please visit: www.investorcentre.com/au.
